## **Auto setup cable for Barco HDTV Monitor, PM 8564/00**

### **Description**

PM 8564/00 is a 6 poled cable with a male 9 poled Sub-D connector at one end and a 6 poled J17 modular connector at the other end. Length 1.5m.

### **Application**

The PM 8564/00 is a dedicated interface cable for connection of a PM 5639/90 CRT Color Sensor to a Barco Monitor of the HDM 5049 type and compatible. Using this setup it is possible to perform a fully automated alignment of the monitor concerning color balance and intensity.

The monitor is equipped with a female 9 poled Sub-D connector for connection of a color sensor. The power needed for the color sensor is supplied from the monitor through the cable.

### **Operating instructions**

The monitor controls the auto alignment process, so please follow the instructions of the monitor manufacturer concerning auto alignment.

It is recommended that the connection and disconnection of the color sensor should be done only with the monitor powered off.
