

## PT 5210 VARiTIME DIGITAL SYNC GENERATOR

and

## PT8603 SDI TEST SIGNAL GENERATOR

Supplement to: PT 5210

Reference: Manual no. 9499 491 02211

The supplement describes the modifications made to the standard instrument.

***This supplement also covers the update PROM kit: 9449 900 22001***

**Feature:** Moving text in the SDI signals for revealing “frozen” transmission lines or processes.

### PT 5210

Software in the PT5210 has been modified to allow for moving text feature in PT8603

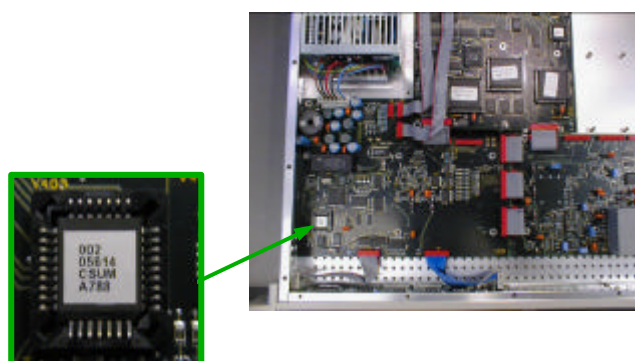

The text menu contains now “Text ON/OFF” only. The remote interface commands are unchanged.

Master software version is 3.7.

Position:	Code number	Checksum
-----------	-------------	----------

V403	4008 002 08031	A35F
------	----------------	------

For positioning of the processor please refer to photo below:

**PT 8603**

- ? Text, if ON, moves vertically, and scroll from line 48 to 100 (first line in black background).
- ? The text scrolls up and down slowly at a rate of 1 line per field.
- ? Text is placed in the blue and red bars in the colorbar
- ? Text may be ON or OFF.

Software version is 3.9

New PROM installed.

Position:	Code number	Checksum
-----------	-------------	----------
