

The rear panel of the Sony CCD-1000 camera features a variety of controls and connectors. At the top, there are two large circular viewfinders with crosshairs. Below these are two sets of controls for audio and time code, each with a circular button and a rectangular display. The central area contains several circular buttons for word clock, SDI bulk, and various time code (TSG) and time program (TPG) functions. To the right, there are two large rectangular buttons for 'CHANGE OVER' and 'REMOTE'. At the bottom, there is a large rectangular fuse holder labeled 'FUSE 1,6 AT' and a 'MAINS' power input section with a ground symbol and a switch.
