

## **Tektronix Design for Environment Statement**

Tektronix has a strong commitment to meet its environmental regulatory obligations. Our key objective is to ensure that our high standards of product quality, reliability and safety are maintained as we strive to reduce the environmental footprint of our products and processes.

To achieve this objective, Tektronix is actively engaged in a corporate wide initiative working with industry consortia to develop and define common technical qualification criteria, acceptable material alternatives, and testing and reporting standards that will allow us to transition our product designs to meet evolving regulatory obligations. We will also provide customers with end-of-life product take-back and recycling capability wherever local law requires.

## Waste Electrical and Electronic Equipment (WEEE) - Product Recycling

In support of our environmental goals, effective August 2005 Tektronix launched a formal product Take-Back and Recycle Program in Europe that complies with the European Union Directive 2002/96/EC on waste electrical and electronic equipment ("WEEE Directive").

This program provides self-service instructions for ease of use product take-back and recycling. Equipment that is returned through this program will be handled in an environmentally safe manner using processes that comply with the WEEE Directive requirements. Please visit our website at <a href="http://www.tek.com/Measurement/Service/recycle/">http://www.tek.com/Measurement/Service/recycle/</a>.

## Restrictions on Hazardous Substances (RoHS) Compliance

Tektronix products are currently out of scope of the RoHS Directive as classified under category 9, Monitoring and Control Instrumentation. We are actively researching and assessing the impacts to product quality, long-term reliability and product performance as it relates to the elimination of environmentally significant substances defined within the RoHS Directive. As we work toward our transition to RoHS-compliant substances, we are also working with our global supply chain partners to adopt "backwards" compatible RoHS compliant components that meet all our product performance specification and manufacturing processing requirements.

If you have any questions regarding the Tektronix Environmental program, including hazardous materials in our products, please contact our Senior Compliance Manager at +1 (503)-627-1220, or email environmental-compliance@tektronix.com
